SEGIBIZ CO., LTD

ELECTRIC TECHNOLOGY

Since 1991

Honest & Trustworthy

Sincere Partner

Growing Company

ISO 9001 : 2015 Quality Management System

Establishment of Research Center

Certificates Status

Acquired ISO 9001 : 2015 (Quality Management System Certificate)

Certified for mark use by TUV SUD, Germany

Acquired NRTL certification by TUV SUD, Germany

Acquired UL Certificate from UL (Testing Laboratory of American Insurance Association)

Acquired IECEx (explosion-proof) Certificate

Passed the EN (European Standards)

RoHS

This approval confirms that no electronic products exported by the company to Europe from July 1, 2006 contain any of the following 10 harmful substances: Pb, Cd, VI, PBBs, PBDEs, DEHP, BBP, DBP, and DIBP.

A portmanteau of the words 'innovation' and 'business' used to refer to technically innovative small & medium sized companies that secure their competitiveness through their technical dominance.

History

2023

- 11. LED AUW-CL100,125 to be released
Wall Lamp, Ø40 Multicolored Signal Tower Lamp to be developed
SG-AL Series - IECEx Explosion Proof Certification
- 09. PD / AUT Series - CE Certification
- 08. TB/AL Series - IK08 / IK10 Rating Conformity
- 07. Switch Protection Cover SG-EC launched
- 06. Single-type Power Distributor Protection Cover launched
Brackets B3-4045,4090 developed
Switch Protection Guard SG-EG launched
- 01. To be selected as a Leading Company of Busan

2022

- 12. Developed Power Distribution 2L06, 3L06-50A
Conclusion of the new agency contract with Dongwon Industrial Systems
- 08. Developed Ø40 Signal Tower
- 06. Developed MC-N-02
- 04. 5 Color Signal Tower Redevelopment, ILOOKS shop renewal open
- 03. Conclusion of the new agency contract with HM plus

2021

- 04. TB30PT development

2020

- 07. New product development : AL-50P-S / Short bar 2p
- 04. Developed MP, MPL(W)
- 03. Released AURORA Tower Light and Warning Light
- 01. Developed Power Distribution Terminal Block 400A
Developed NFB Power Distribution Terminal Block 400A

2019

- 08. Developed Industrial Socket Box
- 07. Developed Wire Connector
- 06. Developed NFB Power Distribution Terminal Block

2018

- 09. Developed HC Terminal Block / Heat-resisting Al Box
Acquired ROHS Certificate
- 03. Acquired UL for Power Distribution

2017

- 09. Acquired UL for CB / PB / AL Series Block(none)
- 04. Developed Power Distribution Terminal Block
Hanoi, Vietnam SAMSUNG SDI Vander registered
- 03. Developed Aluminum Profile Box Sloped Type

2016

- 06. Acquired LED Machine Light CE, IP65

2015

- 12. Acquired AL Series Block(none) TUV
Developed Canada & USA LED Machine Light
- 06. Developed Power Distribution and Signal Tower

2014

- 10. Developed Working Light
- 04. Concluded exclusive contract with METE ENERJI (Turkey)

2013

- 11. Acquired TUV NRTL for CB / PB Series
- 04. Signed exclusive contract with WEICON (Germany)
- 03. Registered as a supplier of Hyundai Motors, Chennai, India

2012

- 12. Acquired ATEX Explosion proof for AL without Terminal Series
- Acquired TUV NRTL for TB Series

2011

- 03. Developed LED Light

2010

- 12. Selected as an excellent example of management consulting for small & medium companies
- 08. Moved to new extended building
- 01. Established the Shopping mall Brand 'BIZ Market',
Obtained INNO- BIZ Certificate
Established company-affiliated R&D center

2009

- 12. Obtained Venture Enterprise Certification
- 11. Acquired TUV Mark
- 06. Renamed SEGIBIZ CO., LTD.

2006

- 06. Founded SEGI-BIZ CO., LTD.
- 04. First export of 'SG-CB-2201' to Toyota Motors
Developed SG-AL-30P

2005

- 10. Received citation from the Director of Small & Medium Business Administration
- 01. Obtained ISO 9001 Certification of International Quality Management System

2003

- 05. Developed PIN BOX TB-15P / TB-20P

2002

- 11. Moved to 128-67, Gamjeon 1(il)-dong, Busan

1999

- 05. Developed PIN BOX 6PT / 10P

1998

- 11. Developed PIN BOX 4P / 6P
- 04. Registered design patent and utility model

1993

- 03. Moved to #7-133, Busan Industrial Distribution Arcade,
Gamjeon-dong, Sasang-gu, Busan

1991

- 12. Founded Segi Electronic F.A. in Yeonji-dong, jingu, Busan

Height

Feature

UL approved product.
Packaging in polyurethane materials using a Forming Machine provides waterproofing and dustproofing effects.

Volts-Covers-Polyurethane packaging- consists of a base
Mounting plates are available separately.
(No mounting plate for SG-AL-6171-48 / 7093-52 models)

Description

Aluminum boxes are basic junction boxes made from aluminum casting, and are mainly used in industrial machinery, robotics, welding machines or automobiles, petrochemical plant facilities, oil supplies and gas supply facilities. Aluminum boxes are easy to install and come in a variety of sizes tailored to the customer's needs, so they can be used in practical ways that serve the user's convenience, and have obtained ROHS certification and UL certification, confirming the safe use of the product.

Product Specifications

Color: Gray
Tolerance: ± 1 mm
Thickness: 3.5t ~ 4t
Operating temperature: -20 ~ 180°C
Protection rating: IP67 / IK10
Material: Aluminum [ALDC 12.1]

Safety Specifications

※ The UL model is an order made.

Safety Specifications

Description

IECEX aluminum explosion proof boxes are certified by IECEx and are used for various purposes in various industries such as factory warehouses. These are rated IP66, protected from dust and high water pressure streams sprayed from all directions. It has 15 different sizes, so it can be used for various purposes in places where explosion-proof requirements are required.

Aluminum Terminal Box

Nomenclature

① Product name
Aluminum Terminal Box

② Number of pins
4 - 50 Pin

Feature

This is all-in-one type terminal with various sizes and terminal types, and its polyurethane foaming is effective for waterproofing and dust proofing, and is highly productive and efficient.

Electrical Specifications

- Allowable current: 10A
- Rated frequency: 50Hz
- Rated input voltage: AC250 Volts
- Withstand voltage: 1880V / 1 minute

Safety Specifications

Product Specifications

- Color: Gray
- Tolerance: $\pm 1\text{mm}$
- Thickness: 3.5t ~ 4t
- Operating temperature: $-20 \sim 70^\circ\text{C}$
- Protection rating: IP67 / IK10
- Material: Aluminum [ALDC 12.1], Terminal Block [ABS]

Description

The aluminum terminal box is an integrated junction box with terminals located inside the box. Our aluminum terminals are manufactured from aluminum with a standard rating of 10Amp to 250V, and the exterior is painted in gray. Just like our aluminum boxes, the aluminum terminal boxes are packed with polyurethane gasket foaming, providing excellent waterproofing and dust proofing, and are used in a wide range of industrial machinery, robotics, commercial wiring and low voltage control systems.

Heat-resisting Aluminum Terminal Box

Nomenclature

SG - **HL** - **4P**

① ②

① **Product name**
Heat-resisting
Aluminum Terminal Box

② **Number of pins**
4 - 50 Pin

Feature

Use of heat-resistant terminals that can be used in temperatures up to 400°C.

Able to work in hotter environments than the AL aluminum series.

Electrical Specifications

Allowable current: 10A

Rated frequency: 50Hz

Rated input voltage: AC 250 Volts

Withstand voltage: 1880V / 1 minute

Description

The heat-resistant aluminum terminal box uses a heat-resistant terminal stand in a box made of aluminum castings, making it more heat-resistant than other terminal boxes, which allows it to be used in environments with higher ambient temperatures. Like the aluminum terminal box of SEGIBIZ it is made to the same standard rating, has excellent waterproof and dust proof effects, and is the same size, so it can be used in various industrial facilities that require heat-resistance.

Product Specifications

Color: Box - Gray / Terminal Block - Ivory

Tolerance: $\pm 1\text{mm}$

Thickness: 3.5t ~ 4t

Operating temperature: -20 ~ 180°C

Protection rating: IP67 / IK10

Material: Aluminum [ALDC 12.1], Terminal Block [mPPO]

IC : Ivory with transparent cover

Feature

The boxes come in two colors – gray and ivory – with three types of covers : gray, ivory and transparent. Excellent waterproofing and dustproofing thanks to the polyurethane packing. Terminal integrated box using ABS, with various customized sizes available for user convenience.

Product Specifications

Color: Gray, Ivory, Transparent cover
Tolerance: ±1mm
Operating temperature: -20 ~ 70°C
Protection rating: IP65 / IK08 / IP2X (TB-4P, 6P Only)
Material: ABS / Transparent cover [PC]
Mounting hole size: 0.17 in

Electrical Specifications

Allowable current: 10A / 15A
Rated frequency: 50Hz
Rated input voltage: AC250 Volts
Withstand voltage: 1880V / 1minute

Safety Specifications

Description

Plastic terminal boxes use ABS and are suitable for sensors, limits S/W, V/V BOX and various kinds of intermediate terminal boxes. Assembling existing prefabricated terminals and boxes is not difficult; productivity is maximized with all-in-one production, which saves resources so that they can be used more practically and safely. It is used in a range of fields, including industrial machinery, robots, commercial wiring, and low voltage control systems.

Feature

UL approved product
The plastic push button box has a hole ($\varnothing 22 / \varnothing 25 / \varnothing 30$) in the cover so that the switch can be installed without a separate process.

Description

The plastic pushbutton box is made in three colors: red, yellow, and white. Plastic push button boxes are used especially often in emergency stop switches, and are safer to use with bright, vivid colors when they are used as emergency switches. This product is designed to be durable and easy to install using PC materials.
This plastic push button box is designed to be durable and easy to install using PC materials.

SG-EG22	Ø22	64 X 82 X 38	32g
SG-EG25	Ø25		
SG-EG30	Ø30		

Description

The switch protection guard is a product that prevents misoperation of switches installed in machinery. It prevents machine contact and at the same time makes a hard case. It can also protect the switch body from damage. Emergency stop switches, such as semiconductor manufacturing devices, machine tools, food machines, and medical machines, etc. It also plays a role in preventing time and productive losses while ensuring safety.

SG - MB - 100 A
 ① ② ③

- ① Product name
Multi Box
- ② Product length
60 - 3800mm
- ③ Product type
M / MA / A / B / C / D / E

Feature

Made of aluminum profiles, it is light and durable. It comes in a total 7 different types, and can be customized based on customer needs.

Product Specifications

Color: Main body - Silver (anodizing) /
 Side plate - Orange
 Tolerance: ±1mm
 Operating temperature: -20 ~ 70°C
 Material: Aluminum profile /
 Side plate [ABS]

Description

Our aluminum profile boxes are lightweight, rugged and customizable to up to 3.8m in length. They also allow special marking with round, square, and other special shape-tapping and laser marking as desired. This product is frequently used in various automation facilities and electronic machines, and is convenient to use, as it is specifically designed to be used as a push button box for mechanical equipment.

Product Specifications

Color: Main body - Silver (anodizing) / Side plate - Orange
 Tolerance: ±1mm
 Operating temperature: -20 ~ 70°C
 Sloping angle: 22°
 Material: Aluminum profile / Side plate [ABS]

Description

Like a general profile box, this allows you to work on the name plate with the product length and special hole processing and laser marking. In particular, the profile sloped box, with its sloped top surface, is more convenient when used as a push button box, and is excellent in terms of exterior appearance.

Safety Specifications

※ The UL model is an order made.

Description

The power distribution is a device that distributes the secondary power supplied from the main power to the primary power of each phase. By improving on the existing complex distribution method, it increases the efficiency of installation work. The PC-made cover and heat-resistant material side plate are highly resistant to shock and heat, enabling you to use it safely.

Power Distribution Terminal Block

Nomenclature

SG - PD - 100 4P
 ① ② ③

- ① **Product name**
Power Distribution Terminal Block
- ② **Rated current**
100A / 200A / 250A / 400A
- ③ **Number of terminals**
4P / 6P / 8P / 9P / 12P

Feature

It can be used efficiently even in narrow spaces, with a more compact size than the conventional model. Installation of hinge-type protective cover and input terminal protective cover prevents accidents such as electric shock.

As screw connection and channel mounting can be done on the main body, installation and maintenance are convenient.

Electrical Specifications

Allowable current : 100A / 200A / 250A / 400A
 Pitch : 20mm / 30mm / 40mm
 Rated input voltage : 600V

Description

The power distribution terminal block type is economical with its small size, and it can be used conveniently by improving work efficiency. It can be mounted directly on the product body in a narrow space, or used by mounting on a standard 35mm DIN rail, and each consists of 1 input terminal and 4~8 output terminals. As it uses heat-resistant material, it is resistant to impact and heat, and the busbar is plated with tin with 99.9% copper, giving it a higher conductivity than brass. The protective cover makes it safer and more convenient to use.

Product Specifications

Tolerance: ±1mm
 Operating temperature: -20 ~ 110°C
 Material: Side plate [mPPO] / Cover [PC]
 99.9% Copper + Tin plated busbar

NFB Power Distribution Terminal Block

Nomenclature

SG - **NPD** - **100** **4P**
 ① ② ③

- ① **Product name**
NFB Power Distribution Terminal Block
- ② **Rated current**
100A / 200A / 400A
- ③ **Number of terminals**
4P / 6P / 8P

Feature

It is easy to connect directly to the main breaker without the need for a separate terminal, and is a space saving product with the same width as the breaker frame.

Product Specifications

Tolerance: ±1mm
 Operating temperature: -20 ~ 110°C
 Material: Side plate [mPPO] / Cover [PC]
 99.9% Copper + Tin plated busbar

Electrical Specifications

Allowable current : 100A (Available with 50A breaker)
 200A / 400A
 Pitch : 20mm / 30mm / 40mm
 Rated input voltage : 600V

Safety Specifications

RoHS CE

Description

The NFB terminal block type power distributor is an upgraded terminal block type power distributor. As there is a link that can be directly connected to the main breaker, it can be connected without the need for a separate terminal. The width of the product is the same as that of the breaker frame, which helps to save space. The heat-resistant material side plate resists shock and heat, and the PC material protection cover prevents electric shock, enabling safe use. As the busbar is coated with 99.9% copper with tin, it has a higher conductivity than brass and can be used efficiently.

Wire Connector

Nomenclature

SG - WC - 01

① ②

① **Product name**
Wire Connector

② **Number of connector**
1Pin

Feature

Rail type connector product that is fixed to the channel and used. The main body is made of PC and the PUSH part is made of ABS, giving it excellent heat resistance and strong impact resistance. Side plate can be ordered separately.

Product Specifications

Color: Ivory, Green - Push, Black - Main Body

Operating temperature: -20 ~ 70°C

Material: Main body [PC] / PUSH [ABS]

Electrical Specifications

Service wire size : 1.5mm² (20 ~ 16AWG)

Rated input voltage : 250Volts

Description

Can be used after connecting by inserting stripped wire that meets the standard while pressing the push part. Used exclusively for DIN rail mounting, by inserting a name strip into the groove of the product push.

Plastic Connector Box

Nomenclature

SG - WC - 06

① ②

① **Product name**
Plastic Connector Box

② **Number of connector**

TECHNICAL INFORMATION

Light & Color

Light and colors are a part of electromagnetic waves, and are converted to physiological energy by the eyes to be perceived by the brain. Humans can only perceive a small range of about 380~760 [nm] electromagnetic waves as light, but express different sensitivities depending on the sense of light and the wavelength. That is, humans can keenly perceive color changes based on the difference in wavelength: red for long wavelength while blue for short wavelength. This color sense is a sensual change related to brightness, which is why yellow makes us feel bright while blue makes us feel dark.

This brightness spectrum, even when it has uniform energy, makes our eyes feel a different sensitivity depending on the wave strength. That is, 555 [nm] of light makes us feel the brightest light, while a longer or shorter wavelength than this gradually reduces the sense of brightness.

Spectrum of electromagnetic radiation

Term Definition

Light velocity

Light velocity means light that is visible to the human eyes. Its wavelength is about 380~760nm, and its unit is ‘ lumen’ (lm), which represents the amount of light passed in unit time and is indicated with “F”.

Luminosity

This refers to the amount of luminous flux per unit solid angle radiating from the light source. The unit of luminosity is Candela (cd), and the indication symbol is “I”.

Illumination

This refers to the brightness of a surface illuminated by a light source. The unit is lux (lx) and the indication symbol is “E”.

Luminance

This represents luminosity per unit area on the appearance of an object observed. The unit used to express it is stilb (sb) or nit (nt).

Light Source Type

Incandescent bulb

Incandescent bulbs are referred to simply as bulbs or incandescent lamps. An incandescent bulb changes electricity to thermal energy, and uses the light radiated from the thermal energy as lighting. Its basic operating principle is to send current to a luminous body called a filament, which is tungsten wire wound in dual coil shape with 3,400 degree of high contact point, and generate joule (J) heat. Incandescent bulbs are cheap, easy to handle, and enable immediate lighting without the need for special equipment. Also, its point light source is so small that any lighting tool can be combined and the color rendition is good. However, the lifespan is as short as 1,000~2,000 hours, and the efficiency is as bad, at 15~20m/W.

LED

This stands for "Light Emitting Diode." It is a light emitting semiconductor where direct current (DC) is flowing. It is an element that changes electrical signals to light signals. LEDs emit different colors depending on the material of the semiconductor, and they are small compared to bulbs, fluorescent lights, and neon tubes. It uses low voltage (DC5V), has very low power consumption (25mW), low heat generation and a semi-permanent service life (longer then 50,000 hrs). In addition, various luminous colors are available (Red, Green, Yellow, White, Blue, etc.).

Comparison graphs for lifespan, brightness, and economic feasibility by the types of light sources

Comparison diagram when the maximum properties (lifespan, brightness, and economic feasibility) of indicating lamps set as 1000, 500, and 700, respectively.

Economic Feasibility

Brightness

Nature of Sound

Sound wave

- Sound: Changes of air density or pressure – that is, the wave of condensation and rarefaction of air particles
- Sound pressure: Changes in sound pressure, and the unit is bar. Minimum sound pressure we can here is 0.0002 μ bar.
- Sound Pressure L (SPL)
- Sound Velocity

3 Elements of Sound

Sound Intensity: Sound volume related to loudness and sound pressure

Sound pitch: Tune, the rise and fall of sound related to sound frequency

Timbre: Related to wave pattern representing a sound

Intensity of Sound

Sound intensity refers to the sensory quality of sound in our ears. The nature of human ears means that we perceive a different level of sound pressure if the frequency changes.

Listen to the sensory quality of a sound based on frequency f (Hz) by comparing to 1000Hz of pure sound as a reference sound, and increase the sound pressure of the reference sound until the sound intensities of two sounds are identical. At this time, the sensory quality of that 1000Hz sound is the loudness level of the sound, and the unit is expressed as phon (ph).

Frequencies near to 3Hz can be heard the most easily by human ears; sounds that are lower or higher than this frequency are harder to hear. Also, frequency properties of 100ph sound are relatively even.

Reverberation

When we listen sounds from audio systems or music instruments, we are listening both to the source of the sound and to the indirect sounds reflected from the wall or ceiling. This means that even when sounds from the original source stop, the reduced indirect sounds still remain, because the indirect sounds arrive slightly later than the direct sounds. This phenomenon is called reverberation.

Electronic Signal Horn

Output Sound Pressure Level & Sensitivity

Speaker sensitivity is a ratio indicating how much of the electrical input applied to a speaker is radiated in the form of acoustic energy. Usually, it is expressed as sound pressure or output sound pressure level created in a specific distance point located at the frontal axis of the speaker, when single input is applied to the speaker. Output sound pressure level of a speaker means the average of sound pressure level created 1m away from the frontal axis of the speaker by applying 1W of input voltage to the speaker within a defined frequency range.

Sound pressure

Sound refers to the changes of air density or pressure – that is, the wave of condensation and rarefaction of air particles. Pressure becomes higher in places with high air density, while it becomes lower than even the air pressure in places of low density.

The human auditory sense receives impetus from subtle changes in the air pressure, and perceives a sound. A sound source is the origin of a sound; a pressure change in a sound source makes the sound smaller in reverse proportion to the distance. This small pressure change is called sound pressure, and is expressed using the same unit as air pressure (bar).

Audible Range

Sound intensities and frequencies audible to human ears are limited. In general, the hearing frequency range audible to the human ear is around 20~20000Hz, which is called audio frequency. Sound can be heard within a range of 0~125dB. A sound needs to be within a steady range to be heard. The lowest sound pressure level audible to the human ear is called the minimum audible limit, while the highest is called the maximum audible limit.

* SH20 Standard type

AUT - L / LF Series

LED Steady / Flashing Signal Tower Light

AUT- L / AUT- LF

External volume adjustment

- LED Steady / Flashing type Signal Tower Light
- Excellent radiant effect achieved using special vacuum metallizing reflector together with high luminance LED
- Operators can change color of each layer
- Color combinations other than standard
- Built-in 8 melodies and notification sounds (basic 4 notes)
- Volume can be adjusted from the outside (Max. 85dB)
- Mounting pole (length, type) are selectable (default SH20)
- Magnet mounted type is available for horizontal pole (SH)
- External diameter : Ø58
- Material : Lens [GPPS], Body [ABS], Reflector [PC], Pole [Al]
- Operating Temperature : -25 ~ 50°C (freezing free)
- ※ Default wire length : 1m
- ※ Use contact-type products when extending more than 10m cable

AUTN - L / LF Series

LED Steady / Flashing Signal Tower Light

AUTN-L / AUTN-LF

Using PC Light Diffusion Lens

Product Features

- Using PC light diffusion lenses, light is subtle and luxurious.
- User Order Specifications Same as AUT-L / LF Series.

- LED Steady / Flashing type Signal Tower Light
- Excellent radiant effect achieved using special vacuum metallizing
- Operators can change color of each layer
- Apart from the standard buzzer, 8 different melodies can be installed
- For melody / Alarm type, different sounds can be applied to each of up to 4 layers
- Volume can be adjusted from the outside (Max. 85dB)
- Mounting pole (length, type) are selectable (default SH20)
- External diameter : Ø58
- Material : Lens [GPPS], Body [ABS], Reflector [PC], Pole [Al]
- Operating Temperature : -25 ~ 50°C (freezing free)
- Default wire length : 1m
- Use contact-type products when extending more than 10m cable

AUT - EN Series

Ø58 Ethernet Signal Tower Light

AUT- EN Series

- A Signal Tower controlled by connecting internet or LAN
- Control with computer web browser or applications
- Can be used for remote control
- Separate utility provided to set IP address, subnet mask, and gateway
- Maximum 4 layers of LED flashing type
- 4 basic sounds (1 buzzer, 3 siren sounds) are provided
- Selectable mounting pole (length, type) (default SH20)
- Magnet mount available when horizontal pole (SH) is ordered as a user additional option
- Outdia : Ø58 / Default LAN length : 3m / Max. 85dB
- Material : Lens [GPPS], Body [ABS], Reflector [PC], Pole [Al]
- Operating Temperature : -25 ~ 50°C (freezing free)

Ø58 Device Net Signal Tower Light

AUT- DN Series

- Signal Tower Light only for Device Net
- Direct connection to network without separated I/O terminal for device net
- Convenient to install and easy to maintain due to the smaller installation space and reduced wires
- Controlled by PLC device net master
- Set the address (MAC ID) and communication speed with built in DIP switch
- Supports all communication speeds (125kbps, 250kbps, 500kbps) in device net, and also supports automatic speed setting for convenient use
- External diameter : Ø58 / Max. 90dB
- Material : Lens [GPPS], Body [ABS], Reflector [PC]
- Operating Temperature : -25 ~ 50°C (freezing free)

Features

- Built-in buzzer, Steady type and DC24V by default
- Color moving by layer is possible
- Buzzer function provided in addition to up to 5 colors of LED unit per Signal Tower.
- Mount using the exclusive bracket

? What is Device Net?

- Device net is a field bus for easy access among control devices such as PLC, PC, sensor, and actuator. Saves wiring cost, reduces the potential for wiring errors, is easy to maintain, and can be used for real-time control. It is CAN-based and strong on noise. As it allows mutual access among devices from different vendors, it enables more economical system establishment. Can remove a connected device from the network without stopping the whole network. An open style field that is used for a wide range of purposes.

Advantages of Device Net Signal tower

- Direct connection to network with built-in device net communication function (power line and signal line are integrated into single cable)
 - Saved space
 - Reduced wiring
- Convenient installation & maintenance

AUT- U Series

- Signal Tower connected to USB port and controlled by programs on PC
- All signals and power are supplied together through a single USB cable (voltage DC5V)
- Can be used on a host that support USB 1.1 or higher
- Can be utilized for a range of purposes as a regular PC accessory
- Basic buzzer is embedded along with up to 5 layers and 5 colors of LED unit per a Signal Tower depending on the model
- Selectable mounting pole (length, type) (default SH20)
- Magnet mounted type is available with the optional horizontal pole (SH)
- External diameter : Ø58 / Default LAN length : 3m / Max. 85dB
- Material : Lens [GPPS], Body [ABS], Reflector [PC], Pole [Al]
- Operating Temperature : -25 ~ 50°C (freezing free)

Use

- To inform of computer process status
- To provide warning signals to many people at a long distance without passing through a monitor
- For any warning message displayed on a computer

AUT - 40L / LF Series

Ø40 LED Steady / Flashing Signal Design Tower Light

AUT- 40 Series

- LED Steady / Flashing signal tower Light
- High brightness LEDs are placed in all four directions and transparent PC cover is used for excellent divergence
- This can be wired with transistor(PNP Type), so it can be used in PLC, etc
- 5 body color options (Black, Yellow, Ivory, Orange and Silver)
- Wiring cable withdrawal type, individual color cannot be changed
- External diameter : Ø40 / Max. 90dB
- Installation bolt : 4mm, Direct connection
- Material : Lens [PC], Body [PC]
- Operating temperature : -25 ~ 50°C (freezing free)

70ST5 Series

Multi-Color LED Square Signal Tower Light

- An economic model that transmits five color signals to the first stage of the square tower light
- High-brightness LED light source for excellent visibility in dark places
- Aluminum square profile makes the appearance beautiful
- Color and buzzer indicating the condition or danger of the machine
- LED color : Red , Yellow , Green, Blue, White
- Rated voltage : AC110~220V / DC24V
- Power consumption : 16W
- Indicating operation : Steady / Flashing
- Sound : buzzer sound < intermittent or continuous sound / volume 1m Max. 90dB at 1m
- Material : Body [Al] / Bracket [ABS] / Lens [PC] / Pole [Al]
- Operating Temperature : -20 ~ 70°C (freezing free)

Common Specifications

Bulb Revolving Warning Light

- ⊙ Excellent radiant effect using special vacuum metallizing reflector
- ⊙ Freely adjustable rotation speed with built-in volume switch
- ⊙ Buzzer siren and melody sounds (Volume Max. 90dB) can be embedded simultaneously with revolving lamp
- ⊙ The built-in tone is 3 notes
- ⊙ Can be adjusted between AC110V ↔ 220V using changeover switch in the product
- ⊙ Microchip-based structure is simple and not affected by external noise
- ⊙ Operating Temperature : -25 ~ 50°C
- ⊙ Material : Globe [GPPS], Body [ABS] / SUS 304] (For AUW-R150S, 180S models)

CAUTION LED Warning Light

Common Specifications

- With the application of the Power LED, the visibility is excellent even in dark places
- Suitable for signal transmission of cleaning trucks, forklifts, roads, and subway construction
- Lighting / Blinking / Strobe 1, 2, 3, 4 functions can be selected and applied according to the site
- Due to strobe characteristics, ambient ventilation is excellent
- AB (buzzer 3 notes), AM (melody 3 notes), AS (Siren 3 notes) / Max. 80dB
- Material : Globe [PC], Body [ABS]
- Operating Temperature: -25 ~ 50°C

AUHW

Warning Light & Electronic Horn Combination

- ⊙ Transmits visual and auditory signals simultaneously
- ⊙ Structure combining LED indicator light and high-quality electronic horn
- ⊙ Clear sound with 8-code high-quality output
- ⊙ 16 modes of tone combination possible by internal DIP S/W operation
- ⊙ Built-in LED steady-flashing change S/W, adjustable volume depending on application environment
- ⊙ Max Volume : Max. 105dB
- ⊙ Protection rating : IP54
- ⊙ Materials : Globe [PC], Body [ABS], Reflector [ABS]
- ⊙ Operating Temperature : -20 ~ 40°C

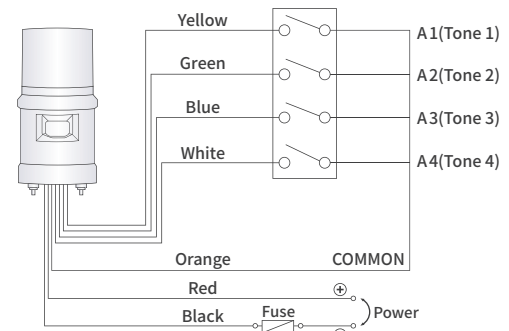

Customization

- ※ Users can control sound combinations through the DIP switches in the product. (See Page 68)
- ※ Settings other than the basic factory specifications (AM, AB) are possible DIP S/W inside the product.
- ※ You can order by setting the desired audible option.

AUP-B

Panel Mounted Speaker

- Although it is small in size, it makes a clear, high capacity sound
- A panel style buzzer and alarm made with 4 channels. Users can choose the tones based on the channel selection
- Clear and fine sound in 8 harmonies
- Users can control 5 types of melodies and 7 types of buzzers according to the selected combination
- Volume control is provided on the reverse side of the product
- Max. 90dB
- Material : ABS
- Operating Temperature : -25 ~ 50°C

Customization

- Users can control sound combinations through the DIP switches in the product (See Page 68)
 If changing user settings is too difficult, the default setting is available when deciding order specifications

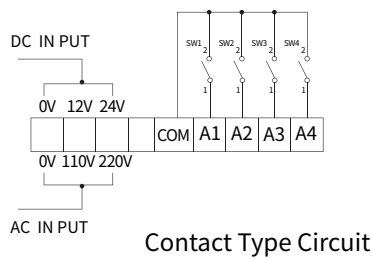

MODEL	Embedded sound				Voltage	Current	Weight
	Channel	Audible Options	Tones	Volume

Wall mounted Warning Light & Electronic Horn Combinations for Heavy Industry Applications

- Wall mounted model configured with heavy duty industrial integral Warning Light & Electronic Horn
- Tone is changeable conveniently with the switch
- Suitable for outdoor, shipping, and heavy industry with completely waterproofed structure
- Convenient line connection with the terminal box
- Material : **Body** [Aluminum (AC7A)], **Globe** [GPPS, PC]
Electronic Horn [ABS]
- Standard body color : MUNSSELL NO. 7.5G / 7.2
- Operating Temperature : -25 ~ 50°C

AUMS Series Common Specifications

① A Variety of Selectable Light Source & Function Combinations

Light Source & Function	Globe Outer Diameter
 Bulb Revolving	 125 mm
 Multiple Function LED steady / flashing / revolving / revolving-flashing	 150 mm
 Caution LED	 125 mm

② Electronic Horn Sound Selection

- 3 kinds of timbres: siren sounds, melody sounds, and buzzer sounds are available for the use
- A switch attached at the outside to change tone

Channel	Audible options	
CH1	Siren AS	Fire
CH2		Emergency
CH3		Urgent
CH1	Melody AM	The Magic Flute
CH2		Home Sweet Home
CH3		Fur Elise
CH1	Buzzer AB	bee bee bee bee
CH2		Ding dong
CH3		bee~bee~bee~

③ Protective Net

- Protective net option is available for Ø150mm globe models according to the user's needs

⑤ High Luminance Type

- High luminance type is available for excellent radiance effect

④ Fully enclosed structure

- Highly durable aluminum housing is a perfectly enclosed structure with excellent waterproofing and dust-proofing
- Convenient line connection with the terminal box installed at the bottom of the product

Special Order LED Warning Light & Electronic Horn

- Effectively usable with LED Warning Light and Electronic Horn integrated configuration
- From among LED Ø100 - Ø150 models, two can be combined
- Applicable for indicating device malfunction, material supply and stop signals, and signal transmission in automation line
- Consist of 8 channels usable according to the user's selection
- Volume is adjustable with external volume controller
- Please contact us to order optional products

 ① ②

① **Product name**
Machine Light

② **Product size (Length/mm)**
146 mm / 280 mm /
414 mm / 548 mm

SG-LED-ML-146

Feature

Acquired CE certification
 To prevent glare on the operator, the glass is frosted.
 The irradiation angle can be adjusted to the desired angle using the bracket provided.

Electrical Specifications

Input voltage : AC110V / 220V (50/60Hz) / DC24V

Description

The machine lights are made of aluminum profile and die cast, and the glass is a chemically strengthened glass that can withstand heat or shock. Effective heat dissipation is provided by the heat sink structure on the back of the product. Machine lights are used for various purposes, such as on work sites, product assembly/inspection lines, machine tools, and for wide area lighting. As it is waterproof with an IP65 protection rating, it can be used smoothly in places with splashing cutting oil or oily water, and has been launched in 4 types with different sizes.

Mounting with bracket

Switch

Headlamp

Magnet

DC jack

Feature

- LED lamp is mounted on the head
- Bellows are connected to the headlamp to allow for flexible movement
- Uses a neodymium magnet with strong magnetic force
- There are two types: the basic wire type and the rechargeable type

Product Specifications

- Color : Blue
- LED color : White
- Illuminance (at 20cm) : 1400 lux
- Operating temperature : -10 ~ 60°C
- Input voltage : AC220V (50/60 Hz)

Description

The work light can be used in the field by fixing it to the required position using powerful neodymium magnets and bellows. It can help increase concentration on work on ships, milling, and tapping that require precision work, and can be used for general purposes as a reading lamp. It can be easily turned on and off using the power button attached to the head, and is available as a basic type and a rechargeable type, so you can use it according to the location.

 Illuminance : 63 lux (at 1m) / 190 lux (at 0.5m)
 Rated voltage : AC110V, AC220V (50/60Hz), DC24V
 Power Code length : 100mm
 Operating temperature : -10 ~ 60°C
 Features : Can be produced in a range of sizes up to 3.8m, in 148mm increments
 Various options can be selected

Model	Size(mm)
SG-LED-1S(B)	25 X 33 X 150(mm)
SG-LED-2S(B)	25 X 33 X 298(mm)
SG-LED-3S(B)	25 X 33 X 446(mm)
SG-LED-4S(B)	25 X 33 X 594(mm)

Rechargeable LED Light

Nomenclature

SG - LED - 1 C - 01

① ② ③

- ① **Product size(mm)**
1 : 150mm 2 : 298mm
- ② **Product type**
Rechargeable
- ③ **Number of batteries**
1ea / 2ea

Battery specifications

18650A 3.7V 2600mAh Lithium-ion battery
 Service voltage : 3.7V / Maimum 4.2V
 Operating temperature : -20 ~ 60°C
 Charging : Fully charged in 3 hours
 Service time : 5 hours of continuous use

※ Charger is selling separatly

Product Specifications

Product color : Black
 LED Color : White
 Illuminance : 63lux (at 1m) / 190lux (at 0.5m)
 Operating temperature : -10 ~ 60°C
 Features : 2 neodymium magnets are mounted

Model	Size(mm)	Weight(g)
SG-LED-1C-01	25 X 33 X 150(mm)	Approx. 180g
SG-LED-2C-02	25 X 33 X 298(mm)	Apprix. 302g
